ABOUT ME

Detail-oriented Data Analyst and Full-Stack Developer with strong expertise in statistical analysis, data visualization, and predictive modeling. Proficient in Python and SQL, with proven ability to transform data-driven insights into actionable strategies that enhance business performance. Hands-on experience in JavaScript-based full-stack development, focusing on problem-solving, code optimization, and building scalable, high-performance applications.

EDUCATION

2023 – 2027

Sri Venkateswara college
of Engineering

B.Tech (Artificial Intelligence and Data Science)

- CGPA: 7.88
- Won Best paper award in NCSPCN-2025.
- Presented a Research Paper in 6th GCAT-2025.
- Student Coordinator, IQAC – SVCE

WORK EXPERIENCE

Dec 2025 – Jan 2026

GMR Innovex, Hyderabad

Project Intern

Worked on real-time projects including a multipassenger QR-based kiosk system and a role-based complaint management system with full-stack integration. Built Power BI dashboards and performed data cleaning, strengthening skills in full-stack development and data analysis.

RESEARCH & CONFERENCES

Mar 2025 – May 2025

NCSPCN 2025 – National Conference Paper Presentation

Developed “FloraFusion,” a full-stack plant care system integrating Fuzzy Logic, IoT monitoring, and an AI chatbot. Presented related research (“Florasense”) at a national conference, winning Best Paper Award.

Aug 2025 – Oct 2025

2025 6th Global Conference for Advancement in Technology

Presented a research paper at the 6th GCAT 2025 on wearable-assisted multimodal emotion recognition using ML for real-time stress and neurological disorder monitoring; published in IEEE Xplore (Feb 4, 2026).

Mar 2026 – May 2026

NCSPCN 2026 – National Conference Paper Presentation

Presented a research paper titled “Wearable-Assisted Multimodal Emotion Recognition for Stress and Neurological Disorder Monitoring” at a National Conference, focusing on AI-based healthcare monitoring using wearable sensor data.

Feb 2026 – May 2026

ICICRCET’26 – 2nd International Conference on Innovative Computing, Research and Cutting Edge Technologies

Published a UGC journal paper titled “Digital Twin-Driven Safe and Explainable Meta-Deep Reinforcement Learning Framework for Adaptive Precision Oncology” focusing on AI-driven personalized cancer treatment and explainable healthcare systems.

PROJECTS

Oct 2025

AI-Driven Genomic Prediction Using Evolutionary Feature Selection

Developed “EvoGene-X” at the Neuroexus Hackathon, leveraging evolutionary algorithms for optimized feature selection and implementing lightweight AI models to improve scalability and efficiency in genomic prediction.

Jan 2026–Feb 2026

Blockchain Based E-voting System

Developed a blockchain-based e-voting system ensuring secure, transparent, and tamper-proof elections using decentralized architecture. Implemented voter authentication, encrypted vote storage, and real-time result verification to enhance trust and data integrity.

Feb 2026–Mar 2026

AI-Powered Innovation Discovery & Research Assistant

- Developed an AI-powered platform to generate hackathon, startup, and research ideas using LLMs, with real-time paper retrieval from arXiv.
- Built a full-stack system using React and FastAPI with features like research summarization, plagiarism detection, and automated PPT generation.

Mar 2026–Apr 2026

AI-Based UV Pattern Reconstruction for Pollinator Analysis

Developed an AI-powered system using Pix2Pix GAN to reconstruct ultraviolet floral patterns from RGB images, simulating bee vision. Trained on FPHS dataset to identify nectar guides and classify pollinator-friendly flowers. Enabled ecological insights for urban biodiversity and smart landscape planning.

ACHIEVEMENTS

- Participated in Hack/her’thon 2.0.
- Participated in Student Research Day 2025 & 2026
- Participated in 24-hour Ideathon organized by TANSAM.
- Participated in Neuroexus Hackathon organized by KNOW I.
- Participated in Tamizhan Skills Ideathon 2026
- Won 3rd prize in “Reverse Pitch” organized by SVCE ACM .
- The Agriva Space Internship Program (Recognized by AICTE).
- Participated in K! hacks Hackathon 2026
- Participated in ICUBE 5.0 (inter college Hackathon)organised by SVCE Science Club
- Participated in Participated in Ideatex ideathon conducted by Student Council of SVCE
- Participated in EASE THE ERROR 6.0 (Inter College Hackathon) organised by FODSE Club of SVCE

SOFT SKILLS

- Communication skills
- Problem-solving
- Teamwork
- Creative thinking

TECHNICAL SKILLS

- Full-Stack Developer
- Data Visualization (Power BI)
- Python for Data science
- Machine learning
